

Salmon Watch Program Summary 2019

Thanks for another successful season!

With generous funding from the Gray Family Foundation, eighteen partners worked together to provide no-cost field trips to students in the Rogue basin; bringing students into the field to learn about their home watersheds.

of students served: 1490+

of classes participating: approx. 48

of schools participating: 18

of field days: 27

of individual instructors contributing: 30

Students learn at four stations:

- Salmon Biology
- Water Quality
- Riparian Ecology
- Macroinvertebrates

Collecting stream macroinvertebrates

Learning about riparian habitats

2019 teacher quotes about what they appreciated about *Salmon Watch*:

“Simply extraordinary! Each station was masterfully led and the learning was incredible!”

“It was so engaging and a wonderful opportunity to make connections to the natural environment. Outdoor learning is great. Instructors were fantastic with kids!” Thank you!

“Actually seeing salmon running. It was a first for me and most of my students. We will never forget it!”

Thank you to our Salmon Watch Partners!
